Ever think of making your own beauty products -- handmade, high performance, healthy alternatives to just about every chemical laden product you currently put on your face and body? It's easier than you think! In Make It Up author Marie Rayma shares the recipes she has developed through years of trial, error, and testing to come up with the very best. This is real makeup and skincare: bright lipsticks, quality mineral powders, long-wearing eyeliners, and masks and cleansers that yield results. Rayma walks you through natural ingredients available online or at

health food stores. These awesome oils, butters, clays, and minerals will replace the petroleum products, artificial colors, and lab-created mystery fragrances that have untold effects on our bodies. Products can be tailored for individual needs -- from swapping out ingredients not suitable for sensitive skin to whipping up the perfect colors suited for any complexion. With easy-to-follow instruction, Make It Up provides more than 40 essential cosmetics and skin care projects so you can make just what you want, when you need it.

Automotive Detailing in Detail takes the combined experience and expertise of three leading detailing commentators to provide a thorough and expansive overview of automotive detailing techniques. From the pre-wash, wash and preparation stages, through machine polishing to paint protection and maintenance, every detailing stage is covered: surface types, contaminants

and products are analysed, before the actual processes are laid bare. In the age of the internet and social media, a plethora of detailing knowledge is available online, yet it is strangely difficult to discover completely, or harness usefully. This book redresses the balance. Aimed at motoring enthusiasts, car mechanics, restorers, valets and those thinking of setting up a valeting/car detailing business and illustrated throughout with 268 colour photographs and 36 line artworks.

The Murray River is home to the largest freshwater fish in Australia - the mighty Murray Cod. In this book Brian Hinson draws on over 40 years experience to reveal the best methods to catch one of these legendary fish. There is also information on other fish species found in the Murray River, including trout, cod, redfin, golden perch, silver perch and catfish. Detailed maps of the Murray River are included, with notes on the best fishing spots and fishing techniques, camp site markers, baits and rigs. Brian has lived and fished on the Murray River for over 30 years. He was also a fishing guide on the Murray for more than a decade where he specialized in catching Murray Cod and Golden Perch between Mildura and Yarrawonga. He is now retired and still spends much of his time fishing.

So you want to turn your Yugo into a Viper? Sorry--you need a certified magician. But if you want to turn your sedate sedan into a mean machine or your used car lot deal into a powerful, purring set of wheels, you've come to the right place. Car Hacks & Mods for Dummies will get you turbo-charged up about modifying your car and guide you smoothly through: Choosing a car to mod Considering warranties, legal, and safety issues Hacking the ECU (Engine Control Unit) to adjust performance-enhancing factors like fuel injection, firing the spark plugs, controlling the cooling fan, and more Replacing your ECU with a plug and play system such

as the APEXi Power FC or the AEM EMS system Putting on the brakes (the faster you go, the faster you'll need to stop) Setting up your car for better handling and cornering Written by David Vespremi, automotive expert, frequent guest on national car-related TV shows, track driving instructor and self-proclaimed modder, Car Hacks & Mods for Dummies gets you into the ECU and under the hood and gives you the keys to: Choosing new wheels, including everything from the basics to dubs and spinners Putting your car on a diet, because lighter means faster Basic power bolt-ons and more expensive power adders Installing roll bars and cages to enhance safety Adding aero add-ons, including front "chin" spoilers, real spoilers, side skirts, and canards Detailing, down to the best cleaners and waxes and cleaning under the hood Using OBD (on-board diagnostics) for troubleshooting Getting advice from general Internet sites and specific message boards and forums for your car's make or model, whether it's a Chevy pick-up or an Alfa Romeo

roadster Whether you want to compete at drag strips or on road courses or simply accelerate faster on an interstate ramp, if you want to improve your car's performance, Car Hacks & Mods for Dummies is just the boost you need. Appleton's Cyclopaedia of Applied Mechanics Exhibiting the Latest Progress in Machines, Motors, and the Transmission of Power, Being a Supplementary Volume to Appleton's Cyclopaedia of Applied Mechanics The Canadian Patent Office Record and Register of Copyrights and Trade Marks Creative Techniques A Semi-monthly Record of the World's Progress in Clayworking... Book Description: Electric kilns are a wonderful thing! They're so readily available and simple to install that any artist can take advantage of the incredible potential this tool has to offer. Nearly every ceramic artist now uses one in some capacity in their studio because electric firing offers a control and dependability not found with any other type of firing. As the popularity of electric kilns has increased over the past few decades,

manufacturers and suppliers made this tool even more versatile. Advances in controllers, energy efficiency, materials and safety make it possible for studio potters to take advantage of this tool for relatively little investment. In Electric Firing: Creative Techniques you'll discover the contributions of studio artists who use electric kilns. They eagerly share the results of their experiments, their research and their artistic successes. Build on what they've learned through the up-to-date information on processes, glazes, tools, materials and techniques they provide. At one time you could make Low-Fire Electric Reds by mixing your own. David Gamble explores the new types of commercially-available reds that will add zing to your work. Gail Kendall demonstrates her step-by-step for decorating colorful work using a variety of methods in Low-Fire Surface Decoration. DaNisha Sculpture is the collaboration of two talented artists, Nisha and Dan Ferguson. The electric kiln allowed them to concentrate on their elaborate forms and decoration. Using the vessel for narrative storytelling inspires Jitka Palmer, who says she enjoys painting on curved surfaces because it makes the images more dramatic. See examples of Using Colorful Underglazes in a variety of ways by top artists. Each winter Kesl and Tilton collaborate on work and their story is intriguing. You'll get a rare look at a sustained involvement of a passionate team. Scott Bennett finds inspiration in jewelry and

explores what happens when you make brooches, pins and rings monumental in size. V'Lou Oliveira uses commercial glazes for the brilliant colors that enhance her playful iconoclastic approach to her work. China Paint is at the lowest end of the temperature range in ceramics and Paul Lewing guides you through the basics to get you started. Joan Takayama-Ogawa uses china paints to decorate her unusual teapots and constructions sometimes taking up to 9 firings to finish a piece. Versatile Recipes for engobes, slips, glazes and self-glazing clays can add a lot of character to your work. Looking at one of the most influential potters of all time, John McQuiston pays Homage to Palissy in his artistic work. Palissy would be amazed at the modern twist. When it comes to Surface and Form Kelly King achieves a personal and contemporary sense of design sure to inspire you. Faith Rahill shows you that Creating Neriage Blocks provide a great way to work three dimensionally with patterns and images. Laura Kukkee reveals how her subtle change in a technique lead her to impressive results with her slip decorating. Paul Wandless maintains that Testing Your Clay provides you with information you can observe, touch and feel firsthand in your own environment. You can expand the capabilities of your electric kiln with gas by Building a Gas/Electric Kiln. It's all about hybrids now. We live in an era of recycling so it makes sense to have a

description for Converting an Electric Kiln for Wood or Gas Firing. If you missed the lecture on kilns, you'll appreciate this refresher course on the Ten Basics of Firing. And much much more!.
